

Ready for **Action Planning**?

Action Planning puts an *implementation plan, outcomes and a timeline* in place to achieve your business strategy.

How does a strategic Action Plan come together?

- 1) Leaders develop a business strategy and strategic objectives (SOs).
- 2) A facilitated discussion with leaders identifies specific tactics and actions that will achieve each SO.
- 3) Specific leaders advance tactical action items over the course of the year, with 90-day accountability check-ins.
- 4) Measures and outcome data show action plan results.

Gaps or failure to effectively action plan significantly limit organizational success and results.

Using a business consultant advances action plan achievement, supporting strategic performance. We help your leaders learn how to execute your strategy.

How Pursuit of Excellence helps...

When we help organizations with strategic planning, action planning and 90-day check-ins are a part of the process. Accountability matters.

A facilitated discussion with senior leaders provides a clear path for action, while managing the scope of work, process efficiencies and results.
